

For Your Stylish life!
The world's **smartest water!**

For a life of different level...
The delicate design and high performance system
brings another sensation into your life.
The smart water Enhancer you dream of

3 Ways to a better Health

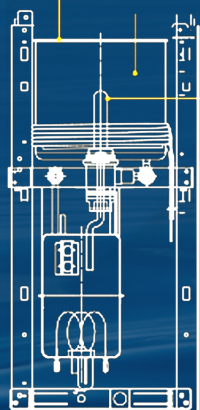

1. UV Sterilizer System

The UV sterilizer optimized for Korea's only water purifier
producing sterilized water right before drinking

Air Filter Equipped

Stainless Tank

1 UV (Ultra violet sterilization)

Real-time sterilizing system operated the moment
the cup touches.
The innovation real-time post sterilization where a
UV sterilization device is installed between the
water outlet and storage tank.

2 BNT (Bio Nano Technology)

World first/ Korea's only BNT technology application.
Strongly vibrates water molecules to shrink water
clusters (hardness) to improve absorption in the body
and suppress bacterial growth.

3 CNT (Carbon Nano Tube)

Application of CNT filter with excellent bacteria
removal properties.
Removes colon bacillus, staphylococcus aureus as
well as norovirus by 99.9%.
The additional silver (Ag) anti-bacterial properties
resolves the weakness of nano filters and bacterial
removal.

2. Alkaline Water

Alkaline, pH 7.5 above and rich in essential,
beneficial mineral.

High pH water can alkalinize the body at the
cellular level and help the blood stream maintain
its appropriate pH. this, in turn, helps to increase
energy, improve sleep, reduce pain, eliminate acid
reflux, normalize blood pressure and weight, and
resist disease.

3. 7 Types of Functional Water

BIOLYTES

Sensible design + High-performance,
Quality water enhancer

BIOLYTES

·Dimensions	(W)290×(D)370×(H)520mm
·Weight	UV,EM-17kg
·Packing	UV,EM - 18kg
·Capacity	4.65ℓ (Tank 0.5ℓ Cold Water 2.6ℓ Hot Water 1.55ℓ)
·Display	Cock Lever Lighting PCB
·Power	Motor: 95W, Heater:500W
·Consumption	
·Rated Voltage	AC 230V / 60Hz
·Enhancer Method	EM – 4-stage hollow fibre membrane with enhance minerals.

Characteristics

- Use of all stainless steel
- Minimized contaminant settlement due to center structured divider (Utility Design)
- Maintain hygienic cock with Clean Cock Cap

Difference in Convenience

Largest chilled water capacity
Extra-large water tray
Pleasing spout lighting display
Metal grilled water tray

Difference in Safety

Clean, all-stainless steel design
FDA, NSF-certified 4-step filtering system

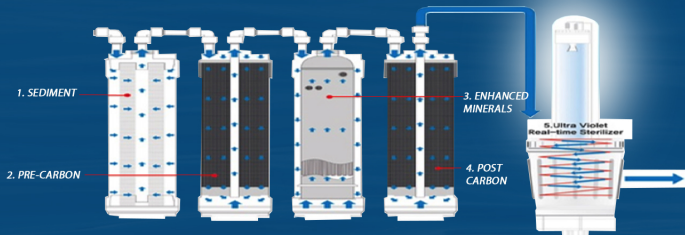

4 Step Filters for the Best Quality

4-step water filter and reduced cartridge number reduces loss and increases filtering stage for maximum water purification and enhancement

※ Capacity is indicated based on actual amount

4 Step Filtration

1 st Step Filter (SEDIMENT) Min 3,000Liters	Removes foreign materials such as dirt, soil, and rust(more than 5 micron)
2 nd Step Filter (PRE-CARBON) Min 3,000Liters	Removes residual chlorine, agricultural chemicals, carcinogenic substances, and absorbs an offensive odour
3 rd Step Filter (ENHANCE MINERALS) Min 10,000Liters	Enhances water alkalinity with beneficial minerals and micro cluster water molecules with beneficial ORP level. It supplies essential minerals such as calcium, potassium, magnesium and sodium to promote healthy cells, bones, joints, organs and skin
4 th Step Filter (POST-CARBON) Min 6,000Liters	Absorb gas ingredients, smell and chlorine remained.
Ultra Violet Real-Time Steriliser	99.9% bacteria UV-sterilized

Awards and Certifications
